Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Tran (US 5,453,987 A).

Tran teaches the method for multiple access by transmission units to a network. With respect to the claim below, references to the prior art appear in parenthesis.

Claim 13. A method for multiple access by transmission units to a network (Tran, Figure 2), for data transmission by time division multiplex within cyclically arranged time slots (Figure 4), wherein in case of colliding data transmissions by two transmission units within one time slot, said time slot is released by both transmission units and another access by each transmission unit to the network is made only after a random time delay (Packets 140 and 150 in Figure 5 with the random time delay described in column 4, lines 43-64).

Allowable Subject Matter

3. Claims 1-12, 14 and 15 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: the claimed subject matter of claims 1 and 14 differ from the prior art in that the invention utilizes three cycles in order to reserve a time slot using priority contention

Art Unit: 2662

resolution while in Tran only one cycle (frame) is needed to reserve a time slot. Further, the claimed subject matter of claim 12 of reserving and releasing further time slots by comparing a value (WS) to a predetermined threshold value (W_{smax}) differs from the prior art methods such as Damien (US 6,229,816 B1), Cidon et al. (US 5,446,737 A) and Hester et al. (US 5,355,374 A) which dynamically allocates unused bandwidths among users.
